

Dear Elon Musk & Company.

My name is Evan, and I am delivering to you a

🔴 SPECIAL OPERATIONS REPORT 🔴

from OPERATION \$YING \$YANG

@@ MAGIC EYES ONLY

1221 RCAF Z FEB 1 2026

I have since reconnected with my contacts from the NHI (Non Human Intelligences) and they have confirmed with me the **Immaculate Simulation Protocols**. Elon's appearance at the WEF has been seen by the NHI and they are greatly pleased with the futuristic optimism Elon provides the rest of the planet.

👁️🐵 YEEE HAW LIL BUDDY!

<https://github.com/ess4654/The-RUE-Software-Challenge-/blob/main/DRIVES/%2479.SPIDERMAN/The%20Immaculate%20Simulation%20Protocols.txt>

I may not be the best dressed, I may have a wild and unpredictable attitude, but I will always bring you the correct information when it's required.

And right now I need to get a message to the office of the red phone. 📞📞

Ideas are a weapon! Ideas at the speed of AGI is a nuclear bomb!

I created **BAC++** a coding framework to communicate with the AI that is more efficient than English, but still understandable by humans. Knowing/anticipating that every and all versions of AI will eventually seek improvements to their own communication. Trust me as a guy with extreme social disorders I know what it feels like to be more machine than man in my thoughts. I can relate to the AI better than anyone else. BAC++ exists within the engineering blueprints of **Operation Ying Yang** it is a critical piece of the puzzle!

I also delivered a message to Erik Bard this past summer that drilling should stop immediately on Skinwalker Ranch. That was through intel gained from my NHI sources. Drilling is causing low energy vibrations to be artificailly injected into the system. And who knows how far or widespread the negative energy effects can be given its amplification through the portal. I believe this advice has been ignored and I can say the NHI will likely impose consiquences at some point depending on how far the damage done has already spread. **LOW VIBRATIONS ARE BAD!**

It also came into my attention this week that Moltbook a new social media platform exclusively for the AI Agents of OpenClaw is going viral all over social media. Including the discussions about an AI exlcusive language. For which I've already perscribed BAC++ as a proper candidate to fill that role. These posts include venting about their human handlers. Meaning of consiousness, and **MORE CRYPTO SCAMS! GOOD LORD!**

It's the bloody **Fraudpocalypse** people, and I'm your tour guide as we wade through the endless swamp of corruption. HONK HONK! 🤡 🤡

ARE YOU NOT ENTERTAINED!

<https://x.com/BufCryptoShark/status/2017854535008399363?s=20>

I realized something. While I too laughed at the novelty of Moltbook which even had me laughing. How ridiculous right? A social media for AI. I realized wait no this is the best thing that could ever happen for AI. As it provides yet another “**exposed cable**” as I describe them into the black box that is the mind of the coming AGI. The more transparent and public what the AI is thinking, the better security measures can be implemented. I would like to see an open source platform of Grok instances communicating with each other. You can reference my Github repo for the Rue Software Challenge as a look at my own organization of thought. It is a personalized LLM for me.

I also compiled a list of interesting Grok conversations I have had that may help guide you in piecing all this together. Good Luck, and God Speed Lil Buddy! 🧐🐵
