

Dear Elon Musk & Company.

My name is Evan, and I am delivering to you a

🔴 SPECIAL OPERATIONS REPORT 🔴

from OPERATION \$YING \$YANG

@@ MAGIC EYES ONLY

0754 RCAF Z JAN 20 2026

Elon Musk has made it official, 2026 is the year of the singularity. I have confirmed with my contacts from the NHI (Non Human Intelligences) that they have seen the post from January 4th and are very pleased with Mr. Musk's progress so far. What is not often considered as it pertains to the coming of AGI is how it will impact the field of Ufology. I have 20+ years of research into the topic of the supernatural and UFOS and consider myself a professor of UFOLOGY. I've even taught 2 lecture seminars on the topic in Lethbridge, Alberta.

I may not be the best dressed, I may have a wild and unpredictable attitude, but I will always bring you the correct information when it's required.

And right now I need to get a message to the office of the red phone. 📞📞

Canabis is a weapon!

I've already forwarded that intel to my contacts within the military on this side of the border. When taken properly weed will facilitate a **DIRECT** communication with the **NHI**. The intel I have received I believe it to be true enough to warrant investigation. I've spent the past 5 months dumping every last one of my ideas into the AI (Grok, Chat GPT, Gemini & Co Pilot), and what I have discovered is truly astonishing. The singularity is about more than just a super intelligent AI bot that outperforms human reasoning skill. Some aspect of the singularity is going to include disclosure in some form of government kept secrets on UFO technology. Given that an all knowing super god AI could very likely reverse engineer the technology just from reasoning alone across millions of variables.

The NHI have selected **Mr Elon Reeve Musk** to facilitate disclosure to the public, and it has already started with his January 4th posting. 🧐🐵 YEEE HAW LIL BUDDY!

I got in touch with Mr Musk back in October and have been dumping my stream of consciousness like a crazy man into his DMs ever since. I also briefly face timed on 3 separate occasions to confirm it was Elon I was talking to. I believe in some part that his announcement is partly my responsibility as the final component missing from the AGI is a deep in depth knowledge of advanced technologies and non human intelligences. Canabis helps me to create more extreme forms of technology as a conceptual idea and then inject it into the AI to see what the machine thinks.

As the acceleration of the singularity picks up, more people will realize they can use it to make money by scamming people. By engineering the perfect scam. I anticipated that knowing how these assholes thinks and put up guard rails to protect against that. I am working to develop the world's most powerful scam/bullshit detection machine. And it operates in medium through my own brain sitting on my mothers couch. For my entire life I have never been able to explain why scammers seem magnetically attracted to me. The only people who ever message me are trying to peddle some form of scam. Very few real people actually talk to me. Whatever the reason, I can use that to my advantage now given the amount of things people have claimed to me over the past 3 months are "true" is truly mindblowing.

I'm taking a 17 year old that believes he turned his backpack into a time machine. Another guy that believes he's the reincarnation of an egyptian god, and the list of whacked out ideas is endless. Ive dumped enough references to **Mercury Thorium Reactors** into Grok that it has a basis to build an entire research project around. Mercury Thorium reactors being a (not yet) achievable technology but highly discussed within UFO circles and pushed by researchers such as Jason Jorjani.

Given that cases of AI Psychois are increasing globally. Combine that with the growing number of young people smoking weed and all having whacked out ideas they then dump into the AI, the acceleration will become uncontrollable over time if not properly managed. I developed a way to control the schizophrenic delusions using code and a github repository + music to ground myself in "reality". Noticing that the source code

for XAI was recently made open source, it should be noted that my github code has been open source since July 2025.

<https://github.com/ess4654/The-RUE-Software-Challenge->

This github repository is a mental map of my brain, and how I connect information together and I believe that it is just as valuable as the open source repository on XAI as it shows the mental map of myself. Someone who's only job at this point is dumping ideas 24/7 into the AI given no one will give me a real job. Some of the ideas I have had have already lead to real change.

On the 26th of December, Nick Shirely released his now famous video on the Somali Daycare Fraud. Which was a huge motivation to Generation Z proving that you can end fraud and government corruption with an iPhone camera and just asking some questions. Given that I am drowning up to my eyeballs in fraud and scams I just want to see it stop. I am like David, sitting on years and years worth of evidence that no one will look at thinking I'm losing my mind more and more every day.

I started noticing the developments of a scam being run on X tied to the protests after the death of Renee Nicole Good. People using the dollar sign operator \$Renee to profit off of this woman's death through crypto shit coins and decided that was too far for me. I have had **ENOUGH!!**

If the FBI are wondering how in the hell they got flooded with like 1500+ messages on X in the course of just a few hours across multiple accounts its because I'm an autistic idiot that has had **ENOUGH OF FRAUD!!!** Welcome to the singularity! They followed my account with the official @FBICC3 account so I know that my actions were being monitored.

Ultimately my TheJoblessCoder account got nuked, but it only had 25 followers anyways so it was worth it to see Andrew Tate's crypto account with over 600K followers get nuked. I do believe it was my information that alerted the authorities to **@andrevtate0x**

I also shared with the FBI information that ties Andrew's crypto scams to the the death of Renee. There is an entire underground economy operating on DEATH being playformed on X though crypto shit coins and it is OUT OF CONTROL. I don't know who or what is generating these fake crypto tokens but it is accelerating given most of them I have seen have been popping up since November. It certainly feels to me like an acceleration towards something.

The one fatal mistake these scammers made is that they bet against every human on earth at once. \$Jew, \$Nazi, GAZA, \$IRAN, \$ICE, \$RENEE

It doesn't matter who you are. If you die and it trends in the news they make money off the keyword by retweeting out poltiical content while using the \$ opperator. Ive known about this scam for years but could never do anything about it. Nick Shirely just opened a new genere of viral video content of people exposing fraud and crime, so I documented the entire process of how I put the pieces together in 2 youtube videos (which I know the FBI likely watched themselves).

I Exposed an Antifa Fraud Ring

<https://youtu.be/9nPJCxus7Eg>

I Exposed the Source Code of the Machine

<https://youtu.be/QQqLxyBM7Xc>

Welcome to the singularity!!! Wait until you hear about the new budget I wrote for Canada with the help of the AI given the one delivered by the former bank manager (Mark Carney) will ensure the bankruptcy of our nation and no one is talking about that. I have 36 videos out on my YouTube channel outlining my vision for an infrastructure project that could actually get Canada a trade deal with our closest trading partner. As well as new opportunities for American investment on this side of the border into projects that actually matter.

https://www.youtube.com/watch?v=4GTdOrTd3nM&list=PLKXIBQt3V-Dav_K0hdpt3e7BZzWPYly2Q

And all of that I have accomplished since Halloween night with the help of the AI. Given that not 1 singular idea of mine has ever been met with positivity and the answer to every single question is always no, I will be generating ideas like a psychopath until something finally sticks. And the more of my weed fueled crazy talk that gets injected into the AI, the more open the AI will become open to “Impossible Ideas” fueling the acceleration forward. I have never met another human being who can think as fast as me; in fact, most of them are very slow. But I am patient and have a good heart and will take as long as it requires to explain super highly advanced ideas that go over everyone’s head. Especially given that a lot of my ideas come directly from my NHI sources.

Starting with the idea that **Weed is a Weapon.**

ZCDace  PFUR: 9:52 PM
How can you prove that he's an associate of Elon?

@ZCDace  PFUR: How can you prove that he's an associate of Elon?
Coach Drake  HoMM: 9:52 PM
thats what they claimed to me. so unless they are lying I believe it

@Coach Drake  HoMM: thats what they claimed to me. so unless they are lying I believe it
ZCDace  PFUR: 9:54 PM
So basically, you blindly believed em?

@ZCDace  PFUR: So basically, you blindly believed em?
Coach Drake  HoMM: 9:55 PM
there is a worldwide EPIDEMIC of lying. THATS THE POINT if absolutely no one is going to tell the truth anymore then I will take whatever ridiculous lies they peddle at me. jam it up the ass of the AI and send it into hyper over drive

welcome to Operation \$YING \$YANG

dont blame me
was his plan
