YEEE HAW FROM CALGARY YYC-A! 🐼🐼

It's Stampede season folks!~ Come on down to the greatest outdoor show on Earth! We have live concerts that run up the night, the best smokies around, and family entertainment! FUN FOR THE WHOLE FAMILY! YEE HAW! 🐼🐼

This week I launched on my Substack a global challenge to every AI company out there. I call it the AI DATA CENTER SCALING PROBLEM.

<https://evansvendsen.substack.com/p/the-ai-data-center-scaling-problem>

Before solving world hunger or curing cancer; AI needs to collaborate with engineers on finding new solutions to its own construction. This challenge is open to any players in the industry. No cash prizes I'm a homeless man living with my parents and can't pay you. What you'll get though is something money cannot buy. Trust & support from the community. Instead of this ridiculous CCP myth pushed by your friend Kevin Oleary.

Classification:
EX69 - Planetary Frequency Anomaly Pattern

Summary of Material:

- Earth: 7.8 Hz (real Schumann resonance)
- Other planets (symbolic tones): 141.27 Hz (Mercury), 144.72 Hz (Mars), 147.85 Hz (Saturn), 183.58 Hz (Jupiter), 207.36 Hz (Uranus), 211.44 Hz (Neptune), 221.23 Hz (Venus)
- Observed pattern: Earth is orders of magnitude lower in frequency than the other planetary tones in this mythic/esoteric system.
